

ENVIRONMENTAL CONSIDERATIONS

1. This company is committed to ensuring that our construction activities will not be harmful to the environment.
2. Do not discharge any chemicals or substances down drains or pour them anywhere on site. Check with your supervisor for the correct disposal procedures.
3. All chemicals, including solvents and paints must be stored only in the designated areas on site.
4. Dispose of empty cans and drums only in accordance with site procedures. *Describe the company site procedures.*
5. Where fuel, oil or chemicals are drawn from drums mounted on stillages, ensure that drip trays are provided and properly used.
6. Always decant liquids, using a funnel where necessary, into the correct containers with sealable caps – never use buckets or open topped containers.
7. When re-fuelling plant and vehicles take care to avoid spillages and overflows.
8. In the event of a spillage of oil or chemicals the aim should be to recover or contain as much as possible, before it seeps into the ground or enters the drainage system.
9. Dispose of all waste materials only in accordance with the site rules.

10. Do not light fires on site unless you have been specifically authorised to do so.

11. Ensure all containers are labelled to show what the contents are.
